Maintenance Procedure video:

Exposed Polished Concrete

Exposed Polished Concrete is an elegant, durable, and low-maintenance flooring solution. Keep your floors pristine and gleaming by following our “Concrete Floor Maintenance Basics,” ensuring they stay clean and reflective without the hassle of refurbishment!

Do's & Dont's

1. **DO** - Dry Dustmop the floor daily to reduce dirt and debris before scrubbing
2. **DO** - Clean the floor daily using Ameripolish® SmartFloor™ Blue Daily Maintenance pad under an auto-scrubber with Ameripolish™ Rejuvenating Cleaner properly diluted
3. **DO** - Clean up spills immediately with clean water or water properly diluted with Ameripolish Rejuvenating Cleaner, then continue running step 1
4. **DON'T** - Do not allow an abundance of water/liquid to stay on your polished concrete surface
5. **DON'T** - Do not use acidic or caustic cleaning products on your polished concrete surface
6. **DON'T** - Do not use steel wool or diamond impregnated pads to clean the polished concrete surface
7. **DON'T** - Do not apply wax or topical coatings to your polished concrete surface

Basic Floor Maintenance Schedule

Sweep/Dust Mop	DAILY
Autoscrub with SmartFloor™ Blue Daily Maintenance Pad & Ameripolish® Rejuvenating Cleaner	DAILY
Reapply Stain Protection (Ameripolish® SR2)	AS NEEDED - Determine by “Water-Test”

The tools you will need:

Any Dustmop

Any Auto-Scrubber

We recommend a minimum of 80lbs of downforce and 140+ rpm

SmartFloor™ Blue Daily Maintenance Pads

SmartFloor™ Rejuvenating Cleaner

Helpful Hints

- Pickup large debris by hand
- Sweep/Dust mop the entire floor before scrubbing
- Auto-Scrub with the SmartFloor™ Blue Daily maintenance pad only
- Use SmartFloor™ Rejuvenating Cleaner properly diluted with water in your scrubber or mop & bucket
- Only use mop & bucket in places where the scrubber can not reach
- Do not use nylon brushes or brushes of any kind on your floor
- Immediately clean up spills to avoid staining/etching

How Much Dirt?

Keep your floors looking pristine and elegant with a regular cleaning schedule! Dirt tracked in from shoes can act like a 200-grit grinding step, causing unsightly scratches that dull your beautiful floors.

National retailers report an average of 10,000 guests per week, each tracking in 1.2 pounds of dirt per 1,000 visitors. That's a staggering 10.2 pounds of dirt per week!

Don't let dirt diminish the beauty of your floors. Commit to a regular cleaning routine and maintain the clean, polished look your space deserves.
