

Growing Your BSC with Concrete Flooring

The demand for long-lasting, hygienic and energy-efficient concrete flooring across America is growing.

5.6%

growth is expected for the global polished concrete market, an increase from \$2.2 billion in 2020 to \$3 billion by 2025.¹

The market growth in North America can be attributed to the increase in the demand for polished concrete for industrial and commercial flooring applications.²

Concrete floors are longer-lasting, more durable, versatile, easier to maintain and more eco-friendly than many traditional floor types.³

Concrete is much more maintenance-friendly than tile or carpeting, but it still requires routine maintenance to maintain its shine and longevity

While polished concrete floors are one of the fastest-growing floor types, many building owners and BSCs are maintaining these floors improperly. Ameripolish offers its SmartFloor Daily Maintenance System specifically designed for maintaining polished concrete floors.

1 step

daily maintenance system

2 step

light-restoration system

An easy to see, color-coded system that allows for identification of the cleaning pad while on the machine.

Wear indicator that shows color through the bottom of the pad to indicate when it's time for a replacement pad.

Innovative and patented composite resin technology.

Compatibility with most auto-scrubbers and floor machines.

Lifetime flooring maintenance support

Made in the USA
